

ABSTRACT OF THE DISCLOSURE

IMPOSITION PROCESS AND APPARATUS FOR  
VARIABLE IMAGING SYSTEM

The present invention is useful for assembling a  
5 book. The inventive method includes the steps of  
specifying pagination information including an indication  
of whether a page is to be selectively included in the  
book, determining whether the page is to be assembled  
10 into the book based on the pagination information, and  
generating page description language instructions for  
production of the book in accordance with the pagination  
information.
